

OVERVIEW

Concrete repair to Letna tunnel with Orlitech mesh 6mm 150mm x 150mm

“ We have completely replaced the steel reinforcement, the issue of corrosion has totally disappeared.”

Concrete repair of the retaining wall of the Letna tunnel.

Approx. 400 m² of Orlitech composite mesh 6/150 × 150

Advantages of composite

- No Corrosion
- Ease of handling on site – 6 x lighter than steel
- less cover of sprayed concrete
- no need for heavy machinery
- time savings
- overall cost savings

ORLITECH COMPOSITES – LIGHTER – FASTER – STRONGER – LOWER EMBODIED CARBON
